# leonardo muñoz

I'm a JS lover developer from Mexico City with 6+ years of experience. I build web apps with a focus on giving a smooth UX to make them intuitive and fun to use. My code mantras are KISS and DRY for writing clean and readable code. The Internet is a fun place, let's make it for everyone!

## 💼 WORK EXPERIENCE

**Jul 2019 | Today**

### Senior React developer - Grio Mexico

- Develop a browser-based responsibe web app using React and Material UI.
- Build a library of reusable React components implementing Redux as state manager.
- Reduce app's loading time by virtualizing render of large data sets.
- Boosted app's performance by inspecting code's impact on React's lifecycle.
- Set and evaluate periodic goals alongside with stakeholders.
- Work with design team to ensure each app's flow has the best possible UX.

**Oct 2018 | Jul 2019**

### Angular developer - Globant Mexico / Sourceability

- Improved user experience by redesigning widgets to be interactive and facilitate the user to manipulate data and rearrange layouts.
- Reduced app's initial loading time by better bootstrapping Angular and better managing DOM manipulation.
- Followed Scrum methodology.

**Sept 2017 | Oct 2018**

### Javascript developer - Globant Mexico / ZapLabs

- Developed web tools to consolidate the administration of the brand's subsidiaries' blogs under a single site.
- Developed new features for blogs using plain Javascript and ES6.
- Followed Kanban methodology.

**Sept 2016 | Aug 2017**

### React developer - Globant Mexico / DWA Nova

- Developed a cross-platform desktop app for managing Adobe Photoshop and Illustrator assets using frontend technologies.
- Created desktop app with React + Redux and Electron, and Adobe plugin with HTML/Javascript.
- Integrated with Node server for local file storage through sockets with WebSockets and socket.io.
- Unit tests done with Mocha, Chai, Sinon and Enzyme.

**Nov 2015 | Sept 2016**

### AngularJS Developer - Globant Mexico / United Airlines

- Developed a control panel to administrate personnel and daily tasks using AngularJS, ES6 and SASS.
- Created widgets with a focus on reusability to share components among projects.
- Automated tasks to build environment and scaffold components using Webpack and Gulp scripts.
- Followed Scrum methodology.

**Aug 2015 | Nov 2015**

### .NET Developer - Indigo Smart Software Development

- Designed and created an API for processing payments in an e-commerce application using .NET.
- Maintenance of existing RESTful web services of a flight ticket booking application.

**2014 | 2015**

### Instructor - KMMX

- Taught courses about HTML5 APIs and features, AJAX with PHP and Java Fundamentals to students ranging from beginners to IT specialists.
